Spiritual Sage
NATURAL VEDIC INCENSE STICKS

WHAT DO WE DO?

We distribute high-quality natural products that contribute to personal development and spiritual inspiration. A unique feature is that we use theertham or sanctified water for all our products, giving them a special vibration.

In South India we provide employment to women from the surrounding villages and we support local development projects for children from less fortunate families.

JOIN THE TEAM

Would you like to participate in the launch of these wonderful products? We guide you in introducing them to your friends, approaching potential customers, maintaining contact with existing customers and participating in trade fairs.

We will regularly communicate in person and meet online with our volunteers. To support you, we provide a guide and order forms. As a token of appreciation, you will receive a personal discount on your own purchases and an expense reimbursement.
